

Thank you for purchasing the stl files for one of our models. We really hope you enjoy them and share with us some pictures when you have it printed.

We recomend printing all our models in resin printers in order to achieve the best quality possible. We haven't tested the models with FDM printers.

Most of our models are sculpted with a 75mm scale or a 1/10 scale in mind. Printing them in their original size will probably give you the best results. That said, you are free to print them in any size you want. Among the files in this folder you'll find one for each one of the pieces and also a file that contains the model merged. If you plan to print the in a small size, the merged model should be a bit easier to print.

If you bought a bust, you'll also find 2 versions of the torso: a solid one, and a hollowed one. The hollowed version should save some material and the draining wholes are already there.

Other than that, I wish you happy printing! Be sure to read the usage rules. If you have any questions, send me an email to mario@boldminiatures.com

Thanks again!
